
SEAL-Tite Non-Hydrophilic Waterstop

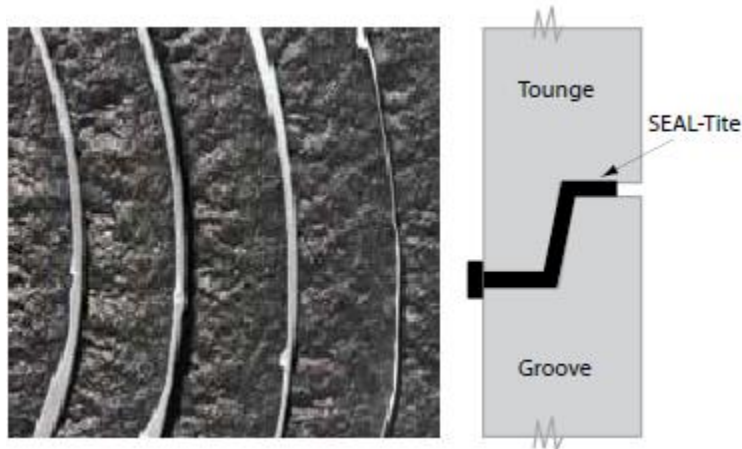

Bonds to cured concrete and fuses to green concrete during the process of hydration and curing. Used for cold and hot joints in Cast-In-Place or Precast Concrete Applications of all types.

Applications:

Residential/Commercial Basements, Secondary Containment Structures, Swimming Pools, Wastewater Treatment Plants, Wall/Floor Penetrations, Highway Tunnels, Precast Joints, Retaining Walls, Storage Tanks, Utility/Burial Vaults. *Not intended for use on expansion joints or joints that move.*

Features and Benefits:

- Not Effected by cyclical wetting/drying.
- Does not rely on swelling to achieve watertight seal.
- Unaffected by moisture/rain during placement.
- Bonds to most substrates.
- No risk of “blow-out” in joints.
- No risk of fracturing concrete due to swelling.
- Easy Installation with Gunable or Brush-On Primer/Adhesive.
- Easy to handle strips between easy-release wrappers.
